Inter-federation security

- Bilateral agreements needed with all the IdPs/federations
  - Each community will have to repeat this
- IdPs would need to assert their security practices
  - Metadata, manual registry, etc.
- Communities would need to maintain their own channels to collaborate
- Please let us NOT do this

- In order to operate across federations, essential to have:
  - **Strong operational collaboration**
  - **Common policy standards & minimal requirements**
