Security for collaborations

- SCI started this work some time ago
- EGI, OSG, PRACE, EUDAT, CHAIN, WLCG, and XSEDE

- SCI is developing a framework to
  - Enable interoperation of collaborating infrastructures
  - Manage operational security risks
  - Build trust and develop policy standards for collaborations
  - Especially in cases where we cannot just share identical security policy documents

- http://cern.ch/go/rhP8
  - SCI is not tied to any group, organisation or body
