

LIPCA

**The Certification Authority for the Portuguese
academic community**

- **March 2002**

Old LIP CA (Issue certificates only to LIP) (DEAD)

- **June 2003**

The LIPCA CP/CPS for the Portuguese academic community has been approved.

- **June 2004**

The LIPCA for the Portuguese academic community is online.

- **LIPCA Certification Authority**

Classic CA Profile

- **Initial Lifetime**

5 years, until June 2009

- **June 2008**

Extended to 20 Years, until June 2024

- **Software**

OpenCA version 0.9.2.1

- **10 Registration Authoritys**

6 Universities and 4 Research Institutes

- **Certificates**

872 Issued Certificates

202 Valid Certificates

And now the Audit

21 B – Recommendation

1 D - Must Change

My conclusion

I'm doing the right thing but is not described in the CP/CPS

Questions?

I have a question!

A VO wants to create a portal and use one single client certificate to perform all grid operations for all portal users. Is this possible ?

Can we use a user certificate from one real user to perform all these operations on behalf of all portal users ?

How about issuing a certificate to the portal itself? Would this be acceptable under the classic profile ?
